SciCode 66: four choices from one recorded batch

o3 | zero: zero-shot | tools: tool calling | Full task: both fail | D = 592.04 s

A/B: same B, D; change only g

C/D: same g, D; change only B

A — 66.2 Surface normals

B = $0.844

zero	$0.044
tools	$0.337

F = {zero, tools}

min cost: zero

Qwen: tools — q = 1 — e = 0.131

B — 66.3 Repulsive potential

B = $0.844

zero	$0.063
tools	$0.545

F = {tools}

min cost: tools

Qwen: tools — q = 1 — e = 1

C — 66.5 Cutoff function

B = $0.353

zero	$0.087
tools	$0.865

F = {zero}

min cost: zero

Qwen: zero — q = 1 — e = 1

D — 66.5 Cutoff function

B = $0.844

zero	$0.087
tools	$0.865

F = {zero}

min cost: zero

Qwen: tools — q = 0 — e = 0

Same choice, different value

Relax budget: satisfaction lost

q: target and resource constraints met

$q = 1[a \in F]$

e: relative cost efficiency

$e = c^*/c$ if qualified; 0 otherwise
